Committed to delivering excellent customer service

# Introduction

---

## Background

Khaya Engineering was established in 2002 by the Managing Director Andile Mtshwane, specializing in the manufacture and supply of material handling equipment such as steel pallets, carriers and trolleys for the local Port Elizabeth Automotive Industry with its major customers being General Motors South Africa (GMSA) and Volkswagen South Africa (VWSA). Since inception of the Company, Andile has been personally involved in the Design and Development of the manufacturing processes for its products as well as the day to day running of the business.

## Leadership

Khaya Engineering is proudly 100% owned by Andile Mtshwane and enjoys a Level 1 BBBEE Status (135% BEE recognition level).

## Competency

Khaya Engineering has invested in the necessary equipment and has ensured specialist training for its employees. A team of experienced and qualified CO2 and Arc Welders have the capacity to successfully take on a wide range of manufacturing tasks.

To ensure the most innovative response to our customer needs, employees participate in technical work groups at Nelson Mandela University (NMU), allowing interaction with technical experts and authorities (eNsta). This important alliance allows rapid and valuable design and testing verification. Khaya Engineering has satisfied the needs of numerous diverse customers and through a capable and motivated team that are committed to delivering excellent customer service.

## Vision

To be a Sustainable Service Provider of Choice in our field.

## Mission

Khaya Engineering will provide our Customers with professional, innovative and cost-effective engineering and technical solutions that are responsive to their needs. We will accomplish this through our strong desire to meet our business objectives with a motivated and skilled team.
